NetSuite Integrator

Seamless Bi-Directional Integration Between Palette & NetSuite

NetSuite is the world's number one cloud ERP platform, and is used by over 25,000 organizations worldwide. As companies become more comfortable with cloud-based environments, the NetSuite user base has expanded to include larger enterprise-scale businesses looking to lower their costs and minimize the IT investment involved in traditional ERP systems.

Recently acquired by Oracle, NetSuite offerings include NetSuite ERP and NetSuite OneWorld. NetSuite ERP is a cloud Enterprise Resource Planning solution, and NetSuite OneWorld is a cloud-based ERP that supports multiple currencies, taxation rules, and support for global enterprise.

Palette Software is recognized as a market leader in advanced process automation solutions, providing efficiency across the value chain from purchase to payment. The company has over 4,000 customers worldwide and has a 95% recommendation rate.

Palette's solutions fully automate transaction processing for invoices, contracts, purchase orders and expenses. The web based interface is fast, intuitive, and accessible in the office or on the road via a smartphone, tablet and laptop.

EchoVera's NetSuite Integrator for Palette's Purchase to Pay Automation Platform

- Leverages the power of Palette and your investment in NetSuite
- Extends the functionality of NetSuite with AP automation that includes data capture, automated invoice approval, 2 and 3 way PO matching, and more
- Seamless and transparent to the end user
- Monitored and updated in track with NetSuite upgrades
- Implementation and ongoing support provided

NetSuite Integrator

How the NetSuite Integrator Works

The EchoVera NetSuite Integrator can be configured to query NetSuite for various data types such as:

- Supplier/Vendor - New and updates
- Account - New and updates
- Subsidiary - New and updates
- Department - New and updates
- Location - New and updates
- Class - New and updates
- Payment Updates
- PO - New and updates
- Goods Receipts
- Currency Exchange - Updates currency exchange rates

The **EchoVera NetSuite Integrator** is an application that is managed by Palette Maintenance Services.

All data transferred between Palette and NetSuite is done via NetSuite Web Services.

The Integrator creates Vendor Bills and Credit Memos in NetSuite and returns the NetSuite Voucher Number to Palette.

Any validation errors that occur during the creation of the Vendor Bill or Credit Memo are sent back to Palette for correction.

The invoice file or a link to the invoice file in Palette can be included as part of the data elements sent to NetSuite during the creation of the Vendor Bill or Credit Memo.

NetSuite Integrator

Palette's AP Automation automates the processing of vendor invoices.
Complete approval workflow with PO matching and invoice archive.
